

# Weekly Meet – 31/01/2024

## MoM

### Attendees:

1. Ritvik
2. Keshav
3. Paridhi Jain
4. Hari Chandana
5. Navdha Bansal
6. Mr. Raj

- We presented our ppt.

### BACK-END:

- Python is not supported, using JS.
- We will Integrate with the new Firebase account later. For now, check it by running on the emulator.

### FRONT-END:

- Now, the Front-end team presented things that they have done this week.
- Only the MainActivity file is modified which renders in all other pages and Navigation is not added yet.
- Data retrieved from Firebase is not shown in UI, just gets printed in the console.
- Query: Laptops are not supporting both Android Studio and the remaining activities simultaneously.
- Answer: Increase the swap space up to 16GB.
- Query: Composable functions are not able to render every time
- Answer: There are some properties for composable functions with which we need to get more familiar.
- Insights:
  - Push the code that you have done regularly.
  - Try to spend some time on these issues don't prolong them.
  - Try to communicate more.
  - Everybody should present what they have done so far for that week.
  - Try to maintain blogs throughout this project.
  -
- Remarks:
  - The Back-end team is doing good.
  - The Front-end team must work harder.

- Goals:
  - By the next 2-3weeks a Basic App with main functionalities should be done.
